Luxury: Paper cover entry in your e-mail book is an experience to make sure that the child you never be ashamed of the adult you are. In NTOINE DE S AINT- E XUPERY H once many years, in a far away country, the world's largest water reservoir began to build. The most powerful politicians and entrepreneurs came together to define an action plan that would condone their interests. And his own corruption ended corruption foundations in this reservoir. Despite the protests of engineers, almost the whole budget has been invested in the external image of the damage, with very little of its underlying foundations. In a waste of opulans, some parts were decorated with gold and diamonds. In addition, he decided to speed up the construction process. This giant architectural work was ready a year earlier than planned. The important thing was to look good for the picture, as it was a great opportunity to impress the whole world. On the day of the became the cover of hundreds of newspapers and news. Years later, during an intense storm, a small crack appeared in the reservoir center. Weeks later, a drop peeked out of that slings. After only a few days, there was a little leg. Second, the rock began dropping, slowly destroying the structure of the damage. That's how the water started to break down. Portions of nearly 20 meters began to leap into the air, bursting within a thousand pieces. Ultimately the reservoir broke out. The tears had been the most cruel thing she found in her wake. The checkpoints disappeared in a matter of minutes. However, the small crack formed on the reservoir's labor day began. Therefore, therefore they destroyed their own self. The system was completely discouraged. The foundations were wrongly laid. Interestingly, politicians and entrepreneurs achieve their goals, though not in the expected way: Falling in dom should be remembered forever. How long will you defer the inevitable? This book is an experience. He had a very specific goal. It aims to remove the foundation upon which you have built – bricks by bricks – the way you relate to yourself and the world. Regardless of how resolved and hardened the cement is. The words that make up this essack aspire to become the deck that will help you expand the cracks in your conscience. What you thought and believe about money, jobs, consumption, the state, businesses and the system largely determines the place you are in the current work scenario right now. It's true you did not choose your birth. Neither opportunity is offered in the social and family environment. Nor could you do much to prevent your mind from conditions when you were still a child without being innocent and innocent. Like the rest of us, we brought up to an obedient employee, a passive taxpayer, and a violating consumer. That is, to earn and spend money in a certain way, so incessantly the economic functioning of the system. However, no question how much you have followed the form of society in the letter, you have made your own decision for years. Evil, they even you have judged these you will judge more time at any given time. And it's precisely your choice that is responsible for the results you've been getting throughout your life. The bad news is that your victim, tragedy, and blame something or someone outside of you will not do you any good, except to relieve—temporarily—helpful and frustration you feel inside you. The good news is that if you assume that you are the main co-creator of your socioeocnic circumstances, you're prepared to start their inventory, learn to reinvent yourself first. It's not about you quitting your job. Or that you're taking another owner's degree. less, not yet. What it's all about taking the queen of your life. Or put another way: Take your personal responsibility, take care of yourself, emotionally and financially. After all, it's your own architectural project or the one in stakes. You're the politician and the businessman. So that's the engineer. You decide how much you want to invest in appearance and how much in the background. The only thing that separates you from becoming the architect of your own life is the fear of freedom. What are you waiting for? Get your own voice. The longer it takes you to start looking for it, the harder it will be for you to find it. WT WT HITMAN must not be the last to know this book is not based on belief or opinion. It has no ideology or dogma to propose to you. It's more of a journalism job. Some chapters are based on articles and reports published in the economic supplement business and in El País Semanal, both in the newspaper El País. For the past seven years, my professional work has been written about the reasons why our existence is like it is at this time of history, promoting reflection that allows us to face our current circumstances from our personal responsibility. This research led me to research the close relationship between human, business and the system. I had the opportunity to interview global management experts like Steven Covey, Fredy Kofman, Eduard de Bono or Ken Blanchard. To enter many business schools, institute training and human resource consultants. Talk to two dozen ekonmists, sociologists and psychologists. And also to know the office of more than 1,500 managers with more than 400 companies, among them nearly everyone listed in the Ibox-35.
